

## FIRST AID: POISONING

Watch the beginning of the video and discuss within your group about what

you should do / you shouldn't do  
you must do / you mustn't do in this situation.

(Justify your answers)

- make the person vomit
- smell their breath
- find out what the person took and when
- make the person drink cold water
- hit them firmly on their back between the shoulder blades
- ask the person how much they swallowed
- make the person drink milk
- make them sit or lie down
- apply some disinfectant around the person's mouth
- call 999 as soon as possible or get someone else to do it
- give them a sugary drink, chocolate or other sweet food
- reassure the person
- push firmly downwards in the middle of the chest and then release
- give them a hot drink
- wrap the person into an emergency blanket

Now watch the end of the video and check your answers. Number the different emergency actions in the right order.

**Harmful  
substance**

Read the following list and circle the substances which are not dangerous

Oven cleaner / dishwasher tablets / pet food / bleach / plant fertilizers  
perfume / toilet cleaner blocks / toothpaste / washing powder  
lemonade / washing-up liquid / water from the tap / drain cleaner

**REMEMBER !**

Can you put the words into order ?

1) cleaning / poisonous / all / are / products / potentially

2) put / water / detergents / empty / never / bottles / into / or / soft drink

3) or / of / all / locked away / products / children / cleaning / out of reach / keep
